

# Hoosier Bats...

Players first switching from aluminum usually want a better-balanced bat. For these players Hoosier Bats has designed the Model HB105 to have the best balance, the extra weight acting as a counter balance to the weight at the barrel end of the bat. The Model HB105 has a thin handle and smaller barrel (2 13/32"), but is one of our most popular models.

HB 105\*

Wood	Lengths	Barrel	Handle	Knob	Weight	Similar
A/B/WF	30" – 34"	2-13/32"	15/16"	Standard	+5 / -5*	P72

HB 125\*

The HB 125 has a 2 1/2 inch barrel with a gradual taper to a 15/16 inch handle with a small conventional knob. Similar to the M159 with a well balanced conventional handle and medium sized barrel for great hitting performance. Designed to deliver a smooth swing every time.

Wood	Lengths	Barrel	Handle	Knob	Weight	Similar
A/B/WF	30" – 34"	2½"	15/16"	Standard	+5 / -5*	M159

HB 145\*

Wood	Lengths	Barrel	Handle	Knob	Weight	Similar
A/B/WF	30" – 34"	2½"	31/32"	Standard	+5 / -5*	S2

HB 215\*

Players who have been swinging wood for a while like an end-loaded bat, that is, they want to feel the weight at the end of the bat. This is so they can generate more power with good balance. The Model HB215 has these qualities. It is an end-loaded bat with a large hitting surface (2 1/2") and thick handle (1").

Wood	Lengths	Barrel	Handle	Knob	Weight	Similar
A/B/WF	30" – 34"	2½"	1"	Standard	+5 / -5*	M110

HB 235\*

The most popular bat is the Model HB235. It has a contoured - or what we call an ice cream cone shaped - knob for a more comfortable bottom hand grip. It is the most popular bat of the Major League players we supply.

Wood	Lengths	Barrel	Handle	Knob	Weight	Similar
A/B/WF	30" – 34"	2½"	15/16"	Cone	+5 / -5*	C271

HB 315\*

The Model HB315 has a standard knob with a generally thin handle and a slight flare in the bottom hand. It has a thin handle and large barrel. The neck rises sharply onto the large and long barrel creating a good hitting surface to work with. Generally considered a power hitters bat as most of the weight is out on the end, making it end loaded.

Wood	Lengths	Barrel	Handle	Knob	Weight	Similar
A/B/WF	30" – 34"	2-19/32"	15/16"	Standard	+5 / -5*	C243

HB 325\*

For those players who would tend to break bats more often Hoosier Bats offers the Model HB325. This model has a thicker handle with an extended - longer barrel and a great bat for a power hitter.

Wood	Lengths	Barrel	Handle	Knob	Weight	Similar
A/B/WF	30" – 34"	2½"	1"	Standard	+5 / -5*	R161

HB Youth\*

The HB Youth bats are excellent for young players (ages 8 and older) learning how to hit. Wood bats make hitters swing shorter, more direct to the ball and more efficient. The sweet spot is smaller and the accuracy necessary to swing a wood bat is far greater than with aluminum. Swinging a wood bat will make younger players a better hitter with aluminum and teach them to play the game the way it was designed to be played. *Youth bats limited to 28" – 31" & 2¼" barrel. Travel Team bats for youth players can have a barrel as large as 2½".*

Wood	Lengths	Barrel	Handle	Knob	Weight
A/B	28" – 31"	See above		Standard	+5 / -5

### HB Batting Practice\*

**Batting Practice/Drill Bat** – The three-piece HB-BP is modeled after the patented WOODFORCE 2000 and is the perfect batting practice baseball bat. The 28" bat has a 2½" barrel and is great for one arm strength building, soft toss drills and hitting drills. This batting practice baseball bat is available in weights from 24 oz. to 30 oz. and bat can be personalized with the player's name at no additional cost.

Wood	Lengths	Barrel	Handle	Knob	Weight
WF	28"	2½"	1"	Standard	24 - 30 oz

### HB 100 Fungo Bat\*

**Fungo Bat** – Made like the WOODFORCE 2000 this bat will not flake, is durable and lightweight, and will not sting hands. Never have to tape the barrel and comes in a variety of colors. Available Lengths: 34", 35" and 36".

Wood	Lengths	Barrel	Handle	Knob
WF	34"-35"-36"	2¼"	15/16"	Cone

**\*Notes:**

- Photos are of the model Hoosier Bat only and not specific to any wood type or length.
- These are the standard Hoosier Bats models. Special Order bats are available but there is a three (3) bat minimum order.
- All adult models are available in ash (A), birch (B) or the three-piece Woodforce 2000 (WF).
- All Ash and Birch bats can range from +5 oz. / -5 oz. in relationship to the bat length. All Woodforce 2000 bats are limited to -3 oz. from the bat length or any weight to maintain BBCOR Certification.
- All bats except the Woodforce 2000 can be cupped.
- All bats can be any painted but colors must be approved for league play. See "Colors" for choice of standard approved selection.
- Hoosier Bat Company will print name on bat for no charge. Signature on bat is an additional cost.
